

# MERCEDES COLLEGE

COMPASSION LOYALTY JUSTICE INTEGRITY RESPONSIBILITY MUTUAL RESPECT

16 December 2019

To whom it may concern,

The International Student Programme Academic staff at Mercedes College, Adelaide South Australia, have examined the testing method provided by Memosa Global Assessment and have found it to be a suitable method to assist with the assessment of an application to study at our IB school.

Mercedes College is happy to accept it as a method to analyse the level of a student's understanding of Mathematics and Science. Knowing the standard of the tests available at Memosa Global Assessment enables us to understand the ability of the student in the four subjects available – Mathematics, Biology, Chemistry and Physics. If a student achieves above 70% it indicates to the school that the student may be a suitable applicant to receive a Scholarship.

Access to the tests and the process of completing the test appeared simple, user friendly and accessible.

I am happy to discuss our assessment of the tests further, should it be required.

Kind regards,

Leanne Moriarty

Coordinator, International Marketing and Enrolments  
International Student Programme
